## A STENERSON LUMBER PUBLICATION

### STENERSON SPOTLIGHT ON SERVICE

This month, Stenerson's Spotlight on Service highlights a brand-new employee. We welcome Tracy Olson as our new Kitchen and Bath Specialist in Detroit Lakes. She began employment with us in November and is settling in quite well to her new position. She comes to us with over 7 years experience in kitchen and bath design at a local lumberyard. Prior to that, she worked for a few years in Elk River, MN in cabinetry sales. Skilled at helping the homeowner find their personal style, Tracy uses that knowledge to design a space for them that fits within their budget. Working with new homes and remodeling projects, she is a great liaison between the contractor and the homeowner. We invite you to take a look at her design work and try her service in your next project. She is excited to work with new clients: contractors, subcontractors, and homeowners alike. A Detroit Lakes graduate, she and her husband, Lee, make their home near Pelican Lake. In her spare time, Tracy enjoys spending time with her family. She, Lee, and her three young children love to spend time outdoors – camping, boating, snowmobiling, four-wheeling, horseback riding – you name it. Tracy can be reached at our Detroit Lakes location at 218-847-2188.

### OPENING THE DOOR TO AFFORDABLE CUSTOM CABINETRY

Based locally in Sisseton, SD; Woodland Cabinetry offers custom cabinets at an affordable price. Woodland Cabinetry is a privately-held company growing since 1994, now employing 140 people on the production floor. Shipping their products nation-wide, they still take pride in the quality workmanship and personal service that you've come to expect. Woodland differs from other major cabinet manufacturers as they do not build any cabinets for stock inventory; each product is built specifically to order. Offering over 170 door styles in 7 species of wood with endless color and finish choices, you're sure to find something to fit your design style and functionality. A quick trip to their website at [www.woodlandcabinetry.com](http://www.woodlandcabinetry.com) shows many of those options. Woodland's production process uses state-of-the-art equipment to ensure optimal material utilization and accuracy, while significantly minimizing waste. This standardization of work practices is key

to achieving consistent results in the cabinetry as well as cost-effective pricing. It also allows for a fully flexible, custom set of cabinets to be delivered with a lead time of only 3 or 4 weeks. You'll find Woodland Cabinetry displays in each of our stores as well as help in choosing the cabinetry to create a warm, inviting, personalized space. Included in this mailing, we have added a list of their current promotions - passing that value along to you. To find out more about this affordable line of custom cabinets, contact your Stenerson Lumber salesperson today.

### NOW AVAILABLE: FINGER-JOINTED STUDS

Newly available at Stenerson Lumber, finger-jointed studs are offered as another greener choice to builders. Made by bonding shorter sections of lumber into longer sticks using structural, water-resistant adhesives, finger-jointed studs help conservation efforts by making the most out of each piece of wood. The use of shorter segments also reduces warping and adds dimensional strength. Manufactured for vertical use only, these studs can be used interchangeably with regular studs – and make for an exceptionally straight wall. They are continually tested during production for bond strength and adhesive durability while complying with grade rules. Although they can be special-ordered in any length from 7' to 12', we are stocking 2x4 studs in the 8' and 9' lengths in all of our stores. Call your salesman to give them a try in your next project!
